THIS collection, in twenty-three books, averaging seventy-five pages each, comprising the most celebrated Vocalises by the foremost Italian, French, and German masters, and regularly employed in teaching by the most distinguished contemporary instructors, has in the course of the past twelve years, become one of the classics of vocal pedagogy. There are six series, for Soprano, Mezzo-Soprano, Contralto, Tenor, Baritone, and Bass, respectively, each series containing four books (except that for Bass, which has three). The vocalises in each series are progressively arranged according to difficulty, thus furnishing a complete graded course in this department of voice cultivation. By virtue of judicious selection, this instruction book is wholly free from one-sidedness—a blemish apparent in so many works by single teachers. It is not, however, intended for beginners, but as a continuation of Concone's "Fifty Vocalises." Each series is headed by a preface, wherein will be found interesting explanatory and instructive matter.

These Vocalises have been most carefully selected and edited; the fine quality of the press-work and thoroughness in proofreading combine to render the collection as perfect and attractive as possible.

The increasing interest in the art of singing and the great success of the collection among singing teachers and pupils prompt us to again draw attention to its merits and its almost indispensable value to the earnest student.
